Journal of Analytical and Applied Pyrolysis, 25 (1993) 427–431
Elsevier Science Publishers B.V., Amsterdam

Subject index

Agriculture
Analytical pyrolysis of humic substances and soils: geochemical, agricultural and ecological consequences, 97
Amber
Application of pyrolysis–gas chromatography and pyrolysis–gas chromatography/mass spectrometry to the unmasking of amber forgeries, 77
Analysis
Polycyclic aromatic hydrocarbons in polystyrene derived pyrolysis oil, 325
Anhydride-hardened epoxy resins
Fluid bed pyrolysis of anhydride-hardened epoxy resins and polyether–polyurethane by the Hamburg process, 293
Archeological food residues
Experimental polysaccharide chars and their "fingerprints" in charred archaeological food residues, 63
Autocatalysis
Modelling of the decomposition of methane at 1273 K in a plug flow reactor at low conversion, 395

Beech wood
A three-dimensional model for determination of kinetic data from the pyrolysis of beech wood, 387
Benzene
Flash pyrolysis of coal sub-structures. A mechanistic and kinetic evaluation, 229
Benzoic acid
Flash pyrolysis of coal sub-structures. A mechanistic and kinetic evaluation, 229
Burley tobacco
Degradation kinetics of tobacco—survey by fast thermogravimetry analysis, 273
Carbosieve
Flash pyrolysis of coal sub-structures. A mechanistic and kinetic evaluation, 229
Catalyst
Polycyclic aromatic hydrocarbons in polystyrene derived pyrolysis oil, 325
Cations
The effect of cations on the thermal decomposition of lignins, 185
Cell wall development
Cell wall development in maize somatic embryos studied by pyrolysis–mass spectrometry, 255
Cellulose
Experimental polysaccharide chars and their "fingerprints" in charred archaeological food residues, 63
Chain transfer processes
Polymer degradation modified by blending with polymers chosen on the basis of their Φ-factors, 11
Chemical ionization
Structural characterization of lignin polymers by temperature-resolved in-source pyrolysis–mass spectrometry and Curie-point pyrolysis–gas chromatography/mass spectrometry, 149
Chemical treatments
The effect of various chemical treatments on the pyrolytic pattern of peat humic acid, 137
Coal
Studies of the yield of sulphur from a coal sample by pyrolysis–gas chromatography, 243
Cross-linking
Effect of cross-linking on the pyrolysis of diphenylalkanes, 407
Curie-point pyrolysis
Experimental polysaccharide chars and their "fingerprints" in charred archaeological food residues, 63
Temperature-programmed pyrolysis–mass spectrometry (TPP–MS) and pyrolysis–gas chromatography/mass spectrometry (Py–GC/MS)—practical applications to industrial problems, 317
Cyanuric acid
Preparation of cyanuric and isocyanic acids in a fluidized bed reactor, 311

Decomposition
Modelling of the decomposition of methane at 1273 K in a plug flow reactor at low conversion, 395
Degradation kinetics
Degradation kinetics of tobacco — survey by fast thermogravimetry analysis, 273
Derivatization
The effect of various chemical treatments on the pyrolytic pattern of peat humic acid, 137
Diphenylalkanes
Effect of cross-linking on the pyrolysis of diphenylalkanes, 407

Dynamics
Dynamics of soil organic matter studied by pyrolysis–field ionization mass spectrometry, 123
E_i-elimination
Pyrolysis mechanisms of *O*-(2-hydroxyethyl) celluloses, 371
Ecology
Analytical pyrolysis of humic substances and soils: geochemical, agricultural and ecological consequences, 97
Effect of additives
Polyaromatization in common synthetic polymers at elevated temperatures, 25
Electrothermal vaporization
Electrothermal vaporization and pyrolysis of materials for environmental analysis, 37
End group
Pyrolysis–gas chromatography for end group analysis of polystyrene macromonomers using stepwise pyrolysis combined with on-line methylation, 1
Environmental analysis
Electrothermal vaporization and pyrolysis of materials for environmental analysis, 37
Estuarine isolates
The application of pyrolysis–mass spectrometry to microbial ecology: rapid characterisation of bacteria isolated from an estuarine environment, 265

FID
Studies of the yield of sulphur from a coal sample by pyrolysis–gas chromatography, 243
Field ionization
Analytical pyrolysis of humic substances and soils: geochemical, agricultural and ecological consequences, 97
Flames
Mechanistic aspects of ionic reactions in flames, 361
Flash pyrolysis
Flash pyrolysis of coal sub-structures. A mechanistic and kinetic evaluation, 229
Fluid bed pyrolysis
Fluid bed pyrolysis of anhydride-hardened epoxy resins and polyether–polyurethane by the Hamburg process, 293
Fluidized bed reactor
Preparation of cyanuric and isocyanic acids in a fluidized bed reactor, 311
Forgeries
Application of pyrolysis–gas chromatography and pyrolysis–gas chromatography/mass spectrometry to the unmasking of amber forgeries, 77

FPD
Studies of the yield of sulphur from a coal sample by pyrolysis–gas chromatography, 243
Fusen
Pyrolysis of "Fusen", 285
Gas chromatography
Analytical pyrolysis and semicontinuous catalytic hydropyrolysis of Organocell lignin, 335 Application of pyrolysis–gas chromatography and pyrolysis–gas chromatography/mass spectrometry to the unmasking of amber forgeries, 77
Polymer degradation modified by blending with polymers chosen on the basis of their Φ-factors, 11
Geochemistry
Analytical pyrolysis of humic substances and soils: geochemical, agricultural and ecological consequences, 97

Hamburg Process
Pyrolysis of "Fusen", 285
Hamburg process
Fluid bed pyrolysis of anhydride-hardened epoxy resins and polyether–polyurethane by the Hamburg process, 293
Heat transfer
A three-dimensional model for determination of kinetic data from the pyrolysis of beech wood, 387
Heterogeneous environment
Effect of cross-linking on the pyrolysis of diphenylalkanes, 407
Humic acids
The effect of various chemical treatments on the pyrolytic pattern of peat humic acid, 137
Hydrocarbons
Mechanistic aspects of ionic reactions in flames, 361
The VEBA OEL Technologie pyrolysis, 301
Hydrogen donor solvents
Effect of cross-linking on the pyrolysis of diphenylalkanes, 407
O-(2-Hydroxyethyl)celluloses
Pyroiysis mechanisms of *O*-(2-hydroxyethyl)celluloses, 371

Inductively coupled plasma
Electrothermal vaporization and pyrolysis of materials for environmental analysis, 37
Industrial problems
Temperature-programmed pyrolysis–mass spcetrometry (TPP–MS) and pyrolysis–gas chromatography/mass spectrometry (Py–GC/MS)—practical applications to industrial problems, 317

Ionic reactions
Mechanistic aspects of ionic reactions in flames, 361
Isocyanic acid
Preparation of cyanuric and isocyanic acids in a fluidized bed reactor, 311

Kinetic data
A three-dimensional model for determination of kinetic data from the pyrolysis of beech wood, 387
Kiviter Process
Pyrolysis of "Fusen", 285
Kraft pulps
Quantification of lignin and carbohydrates in kraft pulps using analytical pryolysis and multivariate data analysis, 209

Lignin
Quantification of lignin and carbohydrates in kraft pulps using analytical pyrolysis and multivariate data analysis, 209
Structural characterization of lignin polymers by temperature-resolved in-source pyrolysis–mass spectrometry and Curie-point pyrolysis–gas chromatography/mass spectrometry, 149
The effect of cations on the thermal decomposition of lignins, 185
Lignosulphonates
The effect of cations on the thermal decomposition of lignins, 185

Macromonomer
Pyrolysis–gas chromatography for end group analysis of polystyrene macromonomers using stepwise pyrolysis combined with on-line methylation, 1
Maize
Cell wall development in maize somatic embryos studied by pyrolysis–mass spectrometry, 255
Mass spectrometry
Analytical pyrolysis of humic substances and soils: geochemical, agricultural and ecological consesquences, 97
Application of pyrolysis–gas chromatography and pyrolysis–gas chromatography/mass spectrometry to the unmasking of amber forgeries, 77
Cell wall development in maize somatic embryos studied by pyrolysis–mass spectrometry, 255
Pyrolysis mechanisms of *O*-(2-hydroxyethyl) celluloses, 371
Structural characterization of lignin polymers by temperature-resolved in-source pyrolysis–mass spectrometry and Curie-point pyrolysis–gas gas chromatography/mass spectrometry, 149
Methane
Modelling of the decomposition of methane at 1273 K in a plug flow reactor at low conversion, 395
Milled wood lignin
Analytical pyrolysis and semicontinuous catalytic hydropyrolysis of Organocell lignin, 335
Multivariate data analysis
Quantification of lignin and carbohydrates in kraft pulps using analytical pyrolysis and multivariate data analysis, 209
Municipal waste
The VEBA OEL Technologie pyrolysis, 301

Nitrobenzene oxidation
Nitrobenzene oxidation vs. pyrolysis–gas chromatography/mass spectrometry as a means to determine lignin composition, 195

Oak wood cask
Assessment of Scotch whisky quality by pyrolysis–mass spectrometry and the subsequent correlation of quality with the oak wood cask, 49
On-line methylation
Pyrolysis–gas chromatography for end group analysis of polystyrene macromonomers using stepwise pyrolysis combined with on-line methylation, 1
Organocell lignin
Analytical pyrolysis and semicontinuous catalytic hydropyrolysis of Organocell lignin, 335
Oriental tobacco
Degradation kinetics of tobacco — survey by fast thermogravimetry analysis, 273

Φ-factors
Polymer degradation modified by blending with polymers chosen on the basis of their Φ-factors, 11
Peat
The effect of various chemical treatments on the pyrolytic pattern of peat humic acid, 137
Phenolformaldehyde novolac
Polyaromatization in common synthetic polymers at elevated temperatures, 25
Phenolformaldehyde resins
Characterisation of rosin-based commercial resins by pryolysis- and simultaneous pyrolysis methylation–gas chromatography/mass spectrometry techniques, 349

Phenolics
Nitrobenzene oxidation vs. pyrolysis–gas chromatography/mass spectrometry as a means to determine lignin composition, 195
Plastic waste
The VEBA OEL Technologie pyrolysis, 301
Polycyclic aromatic hydrocarbons
Polycyclic aromatic hydrocarbons in polystyrene derived pyrolysis oil, 325
Polyether–polyurethane
Fluid bed pyrolysis of anhydride-hardened epoxy resins and polyether–polyurethane by the Hamburg process, 293
Polyethylene
Polyaromatization in common synthetic polymers at elevated temperatures, 25
Polymer degradation
Polymer degradation modified by blending with polymers chosen on the basis of their Φ-factors, 11
Polysaccharide chars
Experimental polysaccharide chars and their "fingerprints" in charred archaeological food residues, 63
Polysaccharides
Quantification of lignin and carbohydrates in kraft pulps using analytical pyrolysis and multivariate data analysis, 209
Polystyrene
Polycyclic aromatic hydrocarbons in polystyrene derived pyrolysis oil, 325
Pyrolysis–gas chromatography for end group analysis of polystyrene macromonomers using stepwise pyrolysis combined with on-line methylation, 1
Pseudomonas sp.
The application of pyroysis–mass spectrometry to microbial ecology: rapid characterisation of bacteria isolated from an estuarine environment, 265
Pulp
Structural characterization of lignin polymers by temperature-resolved in-source pyrolysis–mass spectrometry and Curie-point pyrolysis–gas chromatography/mass spectrometry, 149
PVC
The VEBA OEL Technologie pyrolysis, 301
Py–GC
Studies of the yield of sulphur from a coal sample by pyrolysis–gas chromatography, 243
Py–GC/MS
Nitrobenzene oxidation vs. pyrolysis–gas chromatography/mass spectrometry as a means to determine lignin composition, 195
Temperature-programmed pyrolysis–mass spectrometry (TPP–MS) and pyrolysis–gas chromatography/mass spectroscopy (Py–GC/MS)—practical applications to industrial problems, 317
Pyrolysis derivatisation
Characterisation of rosin-based commercial resins by pyrolysis– and simultaneous pyrolysis methylation–gas chromatography/mass spectrometry techniques, 349
Pyrolysis–field ionization mass spectrometry
Dynamics of soil organic matter studied by pyrolysis–field ionization mass spectrometry, 123
Pyrolysis–gas chromatography
Pyrolysis–gas chromatography for end group analysis of polystyrene macromonomers using stepwise pyrolysis combined with on-line methylation, 1
Pyrolysis–gas chromatography/mass spectrometry
Characterisation of rosin-based commercial resins by pyrolysis– and simultaneous pyrolysis methylation–gas chromatography/mass spectrometry techniques, 349
Pyrolysis–mass spectrometry
Assessment of Scotch whisky quality by pyrolysis–mass spectrometry and the subsequent correlation of quality with the oak wood cask, 49
The application of pyrolysis–mass spectrometry to microbial ecology: rapid characterisation of bacteria isolated from an estuarine environment, 265

Quantitative analysis
Quantification of lignin and carbohydrates in kraft pulps using analytical pyrolysis and multivariate data analysis, 209
Quercus sp.
Assessment of Scotch whisky quality by pyrolysis–mass spectrometry and the subsequent correlation of quality with the oak wood cask, 49

Rapid characterisation of bacteria
The application of pyrolysis–mass spectrometry to microbial ecology: rapid characterisation of bacteria isolated from an estuarine environment, 265
Reverse aldolisation
Pyrolysis mechanisms of *O*-(2-hydroxyethyl) celluloses, 371
Reversible free radical mechanisms
Modelling of the decomposition of methane at 1273 K in a plug flow reactor at low conversion, 395

Rosin
Characterisation of rosin-based commercial resins by pyrolysis- and simultaneous pyrolysis methylation-gas chromatography/mass spectrometry techniques, 349

Scotch whisky
Assessment of Scotch whisky quality by pyrolysis-mass spectrometry and the subsequent correlation of quality with the oak wood cask, 49
Semicontinuous catalytic hydropyrolysis
Analytical pyrolysis and semicontinuous catalytic hydropyrolysis of Organocell lignin, 335
Simulation
Modelling of the decomposition of methane at 1273 K in a plug flow reactor at low conversion, 395
Soil organic matter
Analytical pyrolysis of humic substances and soils: geochemical, agricultural and ecological consequences, 97
Dynamics of soil organic matter studied by pyrolysis-field ionization mass spectrometry, 123
Soil science
Analytical pyrolysis of humic substances and soils: geochemical, agricultural and ecological consequences, 97
Somatic embryos
Cell wall development in maize somatic embryos studied by pyrolysis-mass spectometry, 255
Stepwise pyrolysis
Pyrolysis-gas chromatography for end group analysis of polystyrene macromonomers using stepwise pyrolysis combined with on-line methylation, 1
Sulfur
Mechanistic aspects of ionic reactions in flames, 361
Sulphur
Studies of the yield of sulphur from a coal sample by pyrolysis-gas chromatography, 243

Taxonomy
The application of pyrolysis-mass spectrometry to microbial ecology: rapid characterisation of bacteria isolated from an estuarine environment, 265
Temporary
The application of pyrolysis-mass spectrometry to microbial ecology: rapid characterisation of bacteria isolated from an estuarine environment, 265
Tetramethylammonium hydroxide
Pyrolysis-gas chromatography for end group analysis of polystyrene macromonomers using stepwise pyrolysis combined with on-line methylation, 1
TG/MS
The effect of cations on the thermal decomposition of lignins, 185
Thermal decomposition
The effect of cations on the thermal decomposition of lignins, 185
Thermal decomposition mechanism
Polyaromatization in common synthetic polymers at elevated temperatures, 25
Thermogravimetry
Degradation kinetics of tobacco — survey by fast thermogravimetry analysis, 273
TPP-MS
Temperature-programmed pyrolysis-mass spectrometry (TPP-MS) and pyrolysis-gas chromatography/mass spectrometry (Py-GC/MS) — practical applications to industrial problems, 317
Transglycosidation
Pyrolysis mechanisms of *O*-(2-hydroxyethyl) celluloses, 371

VOT pyrolysis process
The VEBA OEL Technologie pyrolysis, 301

Wood
Structural characterization of lignin polymers by temperature-resolved in-source pyrolysis-mass spectrometry and Curie-point pyrolysis-gas chromatography/mass spectrometry, 149
